Education

Stevens Institute of Technology

B.S. Computer Science

May 2028

Hoboken, NJ

Relevant Coursework: AI & Machine Learning, Algorithms, Systems Programming, Web Programming, Computer Architecture, Security, Privacy & Society

Technical Skills

Languages: Python, SQL, Java, C++, C, JavaScript, TypeScript

Data & ML: Pandas, scikit-learn, statistical modeling, data validation, ETL, SQLite, PostgreSQL

Engineering: FastAPI, REST APIs, React, Next.js, Docker, Git, GitHub Actions, WebSockets, testing, CI/CD

Projects

Insurance Risk Analytics API

Python, SQL, FastAPI, scikit-learn

- Built a reproducible pipeline for 25,000 synthetic life-insurance records with validation, SQLite portfolio analysis, feature preprocessing, and five-fold cross-validation; achieved 0.762 ROC AUC on a 5,000-record holdout set.
- Served model predictions and portfolio metrics through documented FastAPI endpoints; added automated tests, Docker packaging, GitHub Actions, and responsible-use guidance for privacy, fairness, and human oversight.

HyperRisk – Real-Time Portfolio Risk Terminal

Next.js, TypeScript, FastAPI, PostgreSQL

- Built a read-only risk terminal combining REST and WebSocket feeds with Decimal-based exposure, leverage, P&L, funding, liquidation-distance, stress-test, alert, and replay analytics.
- Engineered resilient ingestion with bounded reconnects, malformed-frame validation, a 1,000-message drop-oldest queue, Docker and CI workflows, and 25 unit and integration tests.

Customer Service AI Platform

Next.js, TypeScript, PostgreSQL, AI

- Built a full-stack support platform for 1,000+ tickets with an AI chatbot, sentiment-based routing, automated escalation, role-based access control, and an operational analytics dashboard.

Experience

Hudson Golf

IT Support & Hospitality Associate

May 2026 – Present

Hoboken, NJ

- Resolve TrackMan simulator connectivity, calibration, configuration, and user-interface issues while translating technical steps into clear guidance for guests in a high-volume service environment.

Stevens Software Engineering Club

Technical Project Manager

Aug 2025 – Present

Hoboken, NJ

- Lead a six-person team building a job-portal MVP; manage requirements, roadmap priorities, sprint coordination, stakeholder communication, GitHub Actions, and code-review practices.

The Wash Tub

Operations Data Analyst

Summers 2024 and 2025

San Antonio, TX

- Automated reporting with Python, reducing discrepancies by 20%; analyzed operating metrics to identify bottlenecks and support process changes that increased efficiency by 15%.

Leadership & Involvement

Delta Tau Delta Fraternity – Rho Chapter

New Member Educator

Jan 2025 – Present

Hoboken, NJ

- Lead structured onboarding for 20+ members and coordinate chapter communication, scheduling, and feedback initiatives. Fluent in English and Spanish.
